

Dear New Parents,

The summer math work for your student will be done online at ixl.com. In order for your child to do their work, they will need a username and password. Please email one or both of us:

patricia.fothergill@ourladysacademy.org or

sarah.treacy@ourladysacademy.org and we will happily create an account for your child. Each student has a general set of topics to work on, and we are asking that our new students complete this as well. When we get to know your child and their abilities better this program will be individualized for them.

We look forward to meeting you in the fall.

Sarah Treacy and Patty Fothergill
