

Dear New Parents,

The summer math work for your student will be done online at [ixl.com](http://ixl.com). In order for your child to do their work, they will need a username and password. If you are registering over the summer, your child will have a unique, but generic, username and password. These will change in the fall! You should find attached the username and password for your child to use this summer. Please email us at: [patricia.fothergill@ourladysacademy.org](mailto:patricia.fothergill@ourladysacademy.org) or [sarah.treacy@ourladysacademy.org](mailto:sarah.treacy@ourladysacademy.org) if you have any questions. Each student has a general set of topics to master from the previous year, and we are asking that our new students complete this as well. When we get to know your child and their abilities better this program will be individualized for them.

We look forward to meeting you in the fall!

Sarah Treacy and Patty Fothergill
