

Summer Math Assignment Incoming 7th Grade

Dear Parents of OLA Middle School Students,

We will continue to use the interactive math program, IXL, for summer math work. Since the summer learning loss is still something we are concerned with, but acknowledging that the students need a break from screens, I will be assigning the most relevant skills to ensure success next year. These are skills that the kids have already learned over the course of the school year. Over the summer, students are expected to work for **5 hours or reach 90% on each of these skills**, whichever comes first. When we return in the fall, after a brief review period, the kids will be quizzed on their ability with these skills.

The summer assignment will be graded based on 90% completion of the suggested skills or the amount of time spent actively working on IXL and it will be weighted as $\frac{1}{2}$ of a test -- 50 points. Thus, each $\frac{1}{2}$ hour fully completed is worth 5 points.

Our hope is that the review will take place over the entire summer rather than during the last few days before we return to school. Ideally, your child will be working on IXL a couple of times a week over the course of ten weeks. **All work should be completed between June 16th and August 31st. Work completed after this deadline, although great, WILL NOT be counted towards your grade.**

If you have any questions, please feel free to contact me:

Patricia.fothergill@ourladyacademy.org

Thank you for your support!

Patty Fothergill

Dear Students,

This summer for math practice I have listed the most important skills you need to start **7th Grade Math**. These are some of the most important topics we covered this school year.

You need to reach 90% on each of these skills OR spend five hours in total practicing – whichever comes first! This work will represent 50 points, half of a test grade. When you return in the fall, after a brief review of these skills, you will take a quiz on the material I listed. This September quiz will be worth 50 points, the other half of your test grade!

If you encounter an assigned skill that you don't remember how to do, use the problem solving techniques you learned in fifth grade: go back to your notes, on IXL choose "Learn by Example," or "Not Feeling Ready – Try these Skills First", ask a friend, or view tutorials on the topic at Khan Academy, Math Antics or Math is Fun.

If you complete the material in your grade level rather quickly and you want to keep working please either master all the skills or challenge yourself by finding the corresponding skill in the next grade level and attempt those problems!

If you have any questions, email me! My email is:

patricia.fothergill@ourladyacademy.org I will answer within a day or two.

Have a great summer!

Mrs. Fothergill

Below are the skills you should be working on this summer. All work is in the **6th** Grade tab. IXL often changes their Skill numbering during the summer, so instead of using A2 for example, I have used the permanent skill ID you should search to work on the skill. This skill ID never changes.

TY5	Write multiplication expressions using exponents
XDA	Evaluate exponents
HC5	Find the missing exponent or base
9CP	Prime factorization
AMB	Greatest common factor
NGA	Least common multiple
ZB8	GCF and LCM: word problems
P6W	Add, subtract, multiply, or divide two decimals
8HT	Add, subtract, multiply, or divide two decimals: word problems
2VR	Add, subtract, multiply, or divide two fractions
RDY	Add, subtract, multiply, or divide two fractions: word problems
VMW	Add, subtract, multiply, or divide two integers
8N4	Percent of Numbers and Money Amounts
ZAV	Convert between percents, fractions, and decimals
VMB	Does x satisfy an equation?
VG8	Which x satisfies an equation?
T53	Solve one-step multiplication and division equations with decimals and whole numbers
BXY	Solve one-step equations: word problems
7JV	Solve equations involving integers
